DESCRIPTION

ZUVAGARD CHGI HAND RUBTM_{ECO} is a premium, ready-to-use alcohol-based surgical hand rub formulated with 70% Ethyl Alcohol IP and 0.5% w/v Chlorhexidine Gluconate (CHG) to deliver rapid, broad-spectrum antimicrobial efficacy with prolonged residual protection. The synergistic combination of fast-acting alcohol and persistent CHG provides immediate microbial kill while maintaining continuous antimicrobial activity on the skin, making it an ideal choice for surgical hand preparation and routine hand hygiene in critical healthcare environments. Alcohol provides rapid antimicrobial activity, while low concentrations of chlorhexidine are known to add persistent residual activity beyond alcohol alone.

Designed for healthcare professionals, ZUVAGARD CHGI HAND RUBTM_{ECO} is highly effective against Gram-positive and Gram-negative bacteria, enveloped viruses, fungi, and other clinically significant microorganisms, helping reduce the risk of cross-contamination and healthcare-associated infections (HAIs). The fast-drying, non-sticky formulation requires no water or towels, allowing quick and convenient hand antisepsis without interrupting clinical workflow. Modern alcohol-based hand rubs formulated with emollients are associated with less skin irritation than repeated soap-and-water washing when used correctly.

Enriched with Humectant and skin-conditioning emollients and moisturizers, the formulation is gentle on the skin, helping maintain its natural moisture barrier even with frequent use. It supports excellent user compliance by providing a comfortable feel without leaving residue, making it suitable for repeated daily application in hospitals, operation theatres, ICUs, emergency departments, dialysis units, laboratories, and other high-risk clinical settings. The product is developed to support internationally accepted hand hygiene practices and can be positioned for compliance with applicable EN hand hygiene standards based on validated testing performed for the product.

EUROPEAN NORM EFFICACY PROFILE

EUROPEAN NORMS	TEST ON	TEST TYPE	CONTACT TIME	QUANTITY
EN-13727:2012+A2: 2015 (E)	BACTERICIDAL	QUANTITATIVE SUSPENSION TEST	30 Seconds	1.5 ml
EN-13624:2021 (E)	YEASTICIDAL & FUNGICIDAL	QUANTITATIVE SUSPENSION TEST	30 Seconds	1.5 ml
EN-14348:2005 (E)	MYCOBACTERICIDAL	QUANTITATIVE SUSPENSION TEST	2 Minutes	1.5 ml
EN-12791:2016 (E)	BACTERICIDAL	IN-VIVO SURGICAL HAND DISINFECTION	3 Minutes	3 ml

Surgeons, Physicians, Nurses, Anaesthesiologists, Dentists, Laboratory Technicians, Paramedical Staff, Infection Control Teams, Emergency Medical Personnel

MEDICAL & DENTAL FACILITIES

Hospitals, Multi-specialty Clinics, Dental Clinics, Ambulatory Surgical Centres (ASCs), Day Care Surgery Centres, Physiotherapy & Rehabilitation Centres

PHARMACEUTICAL & LIFE SCIENCE FACILITIES

Pharmaceutical Manufacturing Units, Biotechnology Laboratories, Cleanrooms, Research & Development Laboratories, Medical Device Manufacturing Facilities

GUIDELINES FOR USE – ZUVAGARD CHGI HAND RUB™_{ECO}

ROUTINE HYGIENIC HAND DISINFECTION (1.5 ML- AS PER EN 1500 THE MINIMUM CONTACT TIME SHOULD BE ATLEAST 30 SECONDS)

- Dispense 1.5 mL (approximately one pump) of ZUVAGARD CHGI Hand Rub™_{ECO} into the palm.
- Rub thoroughly over all hand surfaces, including palms, backs of hands, between fingers, fingertips, thumbs, and wrists.
- Continue rubbing until the hands are completely dry .
- Do not wipe or rinse after application.

SURGICAL HAND DISINFECTION (3 ML – UP TO ELBOWS- AS PER EN 1279 THE MINIMUM CONTACT TIME SHOULD BE ATLEAST 3 MIN)

- Ensure hands and forearms are clean and completely dry before application.
- Apply 3 mL of ZUVAGARD CHGI Hand Rub™_{ECO} and rub over both hands and forearms up to the elbows, ensuring complete coverage.
- Continue rubbing until the product has fully evaporated, keeping the skin wet for the manufacturer's recommended contact time.
- Allow hands and forearms to dry completely before donning sterile gloves.

PRECAUTIONARY GUIDELINES

To ensure safe and effective use, avoid direct contact with the eyes and ears. Store the hand rub in a cool, dry place, away from heat sources and open flames. Do not mix with detergents or any other chemicals, as this may alter its effectiveness. Always follow recommended safety instructions to maintain proper hand hygiene and minimize risk.

1
Apply the sanitizer on your palm

2
Rub hand slowly

3
Rub the backs of both hands

4
Rub on the bottom of the nail

5
Rub all between your fingers

6
Keep rub until dry
